

## Features

- Wide 8V to 40V Input Voltage Range
- Output Adjustable from 1.25V to 37V
- Minimum Drop Out 0.3V
- Fixed 150KHz Switching Frequency
- Maximum 3A Switching Current
- Internal Optimize Power MOSFET
- Excellent line and load regulation
- With output constant current loop
- Built in thermal shutdown function
- Built in current limit function
- Built in input over voltage protection
- Recommend output power less than 13W
- SOP8-EP (Exposed PAD) package

## Applications

- Car Charger
- Battery Charger
- LCD Monitor and LCD TV
- Portable instrument power supply
- Telecom / Networking Equipment

## General Description

The HM3102 is a 150KHz fixed frequency PWM buck (step-down) DC/DC converter, capable of driving a 2.5A load with high efficiency, low ripple and excellent line and load regulation. Requiring a minimum number of external components, the regulator is simple to use and include internal frequency compensation and a fixed-frequency oscillator.

The PWM control circuit is able to adjust the duty ratio linearly from 0 to 100%. An enable function, an over current protection function is built inside. An internal compensation block is built in to minimize external component count.

## Pin Configurations

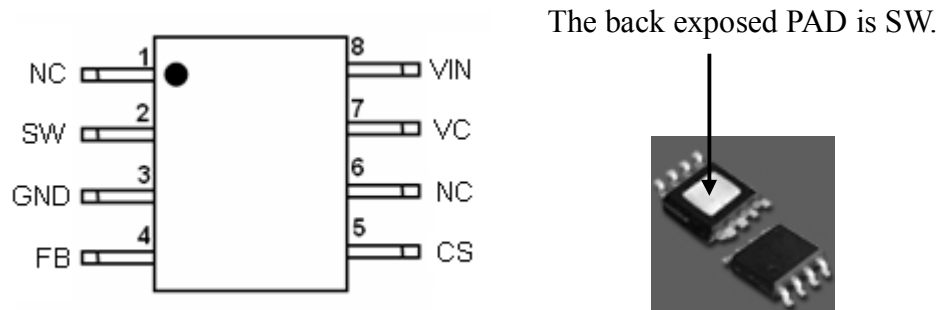

Figure2. Pin Configuration of HM3102 (Top View)

Table 1 Pin Description

Pin Number	Pin Name	Description
1, 6	NC	Not connected.
2	SW	Power Switch Output Pin (SW). Output is the switch node that supplies power to the output. (Note: <b>Connected the back exposed PAD to SW.</b> )
3	GND	Ground Pin.
4	FB	Feedback Pin (FB). Through an external resistor divider network, Feedback senses the output voltage and regulates it. The feedback threshold voltage is 1.25V.
5	CS	Output Current Sense Pin; ( $I_{load}=0.11V/R_{cs}$ )
7	VC	Internal Voltage Regulator Bypass Capacity. In typical system application, The VC pin connect a 1uF capacity to VIN.
8	VIN	Supply Voltage Input Pin. HM3102 operates from a 8V to 40V DC voltage. Bypass Vin to GND with a suitably large capacitor to eliminate noise on the input.

### Ordering Information

Package	Temperature Range	Part Number	Marking ID	Packing Type
		Lead Free	Lead Free	
		HM3102	HM3102	

Pb-free products, as designated with “E1” suffix in the par number, are RoHS compliant.

### Absolute Maximum Ratings (Note1)

Parameter	Symbol	Value	Unit
Input Voltage	V <sub>in</sub>	-0.3 to 45	V
FB Pin Voltage	V <sub>FB</sub>	-0.3 to V <sub>in</sub>	V
SW Pin Voltage	V <sub>SW</sub>	-0.3 to V <sub>in</sub>	V
Power Dissipation	P <sub>D</sub>	Internally limited	mW
Thermal Resistance (Junction to Ambient, No Heatsink, Free Air)	R <sub>JA</sub>	60	°C/W
Maximum Junction Temperature	T <sub>J</sub>	-40 to 150	°C
Operating Junction Temperature	T <sub>J</sub>	-40 to 125	°C
Storage Temperature	T <sub>STG</sub>	-65 to 150	°C
Lead Temperature (Soldering, 10 sec)	T <sub>LEAD</sub>	260	°C
ESD (HBM)		>2000	V

**Note1:** Stresses greater than those listed under Maximum Ratings may cause permanent damage to the device. This is a stress rating only and functional operation of the device at these or any other conditions above those indicated in the operation is not implied. Exposure to absolute maximum rating conditions for extended periods may affect reliability.

**Note2:** Internal temperature compensation circuitry is provided to compensation the PCB and external line loss in system application. When the junction temperature or the output power rise, the feedback voltage will be compensated. This function is provided to compensation the PCB and external line loss in system application.
