

充电电流设置: $I_{CH} = 0.12V/R_{cs}$
 截止电压设置: $V_{bat} = 1.205V(R_3/R_4 + 1)$
 MPPT电压设置: $V_{mppt} = 1.205V(R_1/R_2 + 1)$, MPPT电压一般建议设置在截止电压+2V比较合适。
