## 2-channel Constant Current Regulator

### INTRODUCTION

The HM7502 is a 2-channel LED driver, designed for current regulation. It may be used in various current regulation circuits, especially suitable for LED applications. It lets LEDs work under stable current and avoid brightness unstable caused by current change, while its low voltage can reduce power consumption.

The connection of the V<sub>DD</sub> power pin may also be used for brightness control of LEDs via PWM signals; therefore suitable for applications that need brightness adjustment.

The connection of R<sub>EXT</sub> pin can be used for the control of output current, to control and drive more LEDs. When R<sub>EXT</sub> is open, V<sub>CH1</sub>, V<sub>CH2</sub> pins may provide 30mA of current. To achieve operations with V<sub>CH1</sub>/V<sub>CH2</sub> current over 60mA, connect the ICs in parallel.

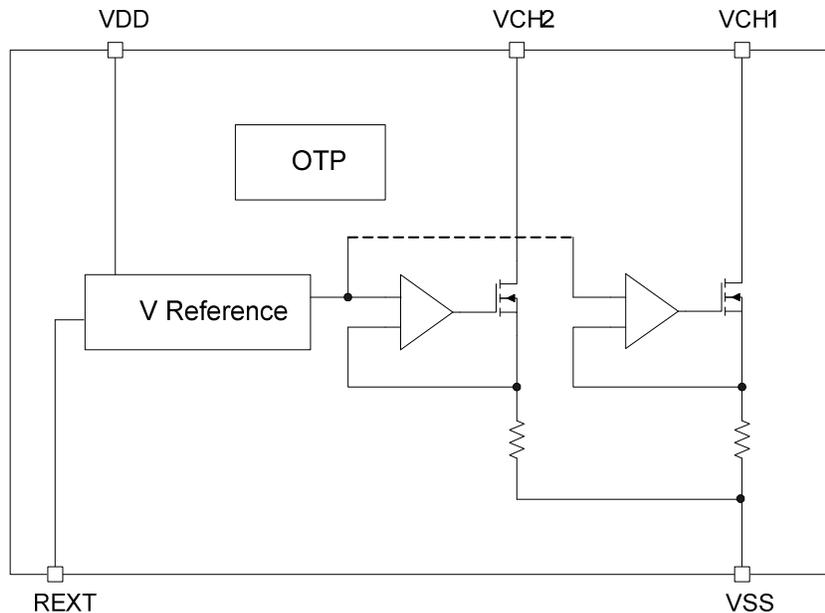

### MAIN APPLICATIONS

- LED Light Bars, LED Bulbs, LED Fluorescent Lights, LED Backlight

### FEATURE HIGHLIGHTS

- Wide operation supply voltage range: 2.5V ~ 40V
- Wide output voltage range: 2.5V~40V
- 30mA to 60mA /per channel sink current
- Accurate sink current: ± 5%
- V<sub>DD</sub> pin as OE function: up to 100KHz frequency
- Negative temperature coefficient: ± 500ppm/°C
- Less than ±0.5%/V load regulation
- -40°C ~+85°C operation temperature range
- High temperature protection: 95°C ~ 155°C
- Pb-free and green package: SOT89-5, SOT23-5

## TEST CIRCUIT

$$I_{VCH(R_{EXT})} = \left(1 + \frac{R_{IN}}{R_{EXT}}\right) \cdot I_{VCH(open)}$$

where  $R_{IN}=11300\Omega$ , and  $I_{VCH}$  is reference current with  $R_{EXT}$  open.
